

"This year's congress brought together total of 240 participants, supported by 23 exhibition booths, creating a vibrant platform for learning, collaboration, and professional networking.

Among the highlights of CARINA 2026 were:

The launch of the Dr Fauziah - CHEST Alor Setar Travel Grant, a meaningful initiative to support future academic and professional development of junior doctors.

An outstanding faculty comprising 4 international speakers and 16 national speakers, sharing their expertise across two parallel tracks covering a wide range of current and relevant topics.

Engaging workshops, including highly anticipated medicolegal session, providing practical insights for daily clinical practice.

Scientific sessions featuring oral/video presentations, with 11 impressive entries showcasing innovation, research, and clinical experiences. Congratulations to our fellow, Dr. Izzatul, on winning 3rd Prize for her presentation.

We were also honoured to welcome delegates from India and Indonesia, further strengthening regional collaboration and friendship.

Our pre-congress programme on Severe Asthma was exceptionally well received, setting the stage for two days of enriching discussions and knowledge exchange.

We would like to express our deepest appreciation to our Hospital Director for officiating the event.

Some of the points regarding CARINA26

Thank you
