4:00 pm – 8:00 pm

EQ Hotel Kuala Lumpur

NAFAS 2026: Phoenix and Lion Wisdom in Severe Asthma

Join us for a hybrid webinar featuring a distinguished international speaker alongside local experts, with real-world case discussions and breakthrough therapies. We'll spotlight OCS-sparing approaches and the latest evidence on eosinophilic depletion and remission with **TEZSPIRE** and **FASENRA**. Cases will include severe asthma with comorbid nasal polyps and EGPA, emphasizing practical decision-making, biomarkers, and long-term outcomes.

Connect, challenge assumptions, and help shape the next chapter
of severe asthma care. **#Hero4Zero #SlaySevereAsthma**

AGENDA

TIME	TOPIC	SPEAKERS
