2025 Practical Tips for Clinical Decision Making in Resource-Limited Settings

Medical officers and allied health professionals in resource-limited settings often face the challenge of making critical clinical decisions due to limited access to specialist input, diagnostic tools, and treatment options. This program is tailored to support them—offering practical tips and insights from experienced consultants in respiratory medicine, emergency care, haematology, radiology, and more.

Designed by clinicians for clinicians, this workshop delivers real-world strategies to strengthen decision-making and enhance patient care where it matters most.

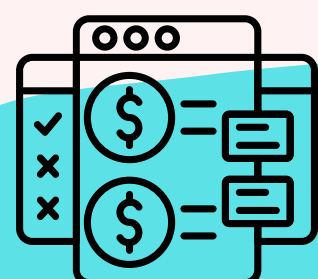

Session 1: 11th October 2025; 8:30 am - 4:15 pm

Session 2: 25th October 2025; 9:00 am - 4:15 pm
