

SARAWAK ASTHMA COPD WORKSHOP 2025

Event Report

Date: 14th June 2025

Venue: Kingwood Hall, Kingwood Hotel, Sibul, Sarawak

Prepared by: Ing Shan Kai, Organising Committee

1. Introduction

The Sarawak Asthma COPD Workshop 2025 was successfully held on 14th June 2025 at Kingwood Hotel, Sibul. The event aimed to enhance the clinical competencies of healthcare professionals in the diagnosis, management, and hands-on skills related to asthma and chronic obstructive pulmonary disease (COPD).

2. Attendance

The workshop saw a strong turnout with a **final attendance of 98 participants**, comprising doctors, nurses, and allied health professionals from across Sarawak.

3. Programme Highlights

- **Lectures and Discussions:** Delivered by experienced speakers, the sessions provided comprehensive updates on asthma and COPD, including latest guideline-based practices.
 - **Hands-on Stations:** Participants were divided into four rotating groups and engaged in interactive skill-based stations covering various practical aspects of asthma and COPD care.
 - **CPD Accreditation:**
 - 8 CPD points were awarded to participants.
 - CPD claims were facilitated through both MMA and AMM CPD systems.
-

4. Hands-on Session

Participants were grouped into four rotating teams, allowing each to experience all practical stations. Feedback collected post-event highlighted this segment as particularly **productive and useful**, with many citing it as the most beneficial part of the workshop.

5. Logistics & Certification

- All participants received a care package upon registration.
 - E-certificates will be emailed within a week, conditional upon feedback form completion.
 - CPD points were awarded as per respective professional systems.
-

6. Feedback Summary

Post-event feedback indicated a high level of satisfaction:

- **Hands-on stations** were frequently praised for their interactivity and relevance.
 - Participants appreciated the **structured rotation** and practical application of skills.
-

7. Conclusion

The Sarawak Asthma COPD Workshop 2025 successfully met its objectives in delivering both theoretical knowledge and practical skills in asthma and COPD management. The overwhelming positive response from participants reinforces the importance of such workshops and sets a strong foundation for future events.
